

Counterpoint NCR Payment Solutions

Current Program

Program ends - TBD

Current Counterpoint Program

- NCR will match or beat current processing rates
- NCR will discount Secure Pay to \$0.02
- If there becomes a device delay NCR will begin changing Secure Pay rate to \$0.02 upon boarding
- No credit card module required with NCR processing
- Rate lock of NCR processing fees for 3-year contract
- \$100 early termination fee (regardless of # of locations)
- MyMobileMoney setup and (1) device at no charge
- Optional Standalone processing through Pax device (must purchase) is available and qualifies for program (no MMM device)
- Program end date is TBD

Why MyMobileMoney

As businesses pivot to delivery, curbside pick-up, and off-premise options to bring in much needed revenue, you need a quick, secure way to take payments outside of your brick-and-mortar location. Our mobile payments application is the tool for businesses to process payments quickly and securely. It's the smart solution built for back up and mobile payments.

Optional Standalone device

- Pax A80 Device
- Point to Point Encryption (P2PE)
- Immediate data encryption keeping your client's data secure

Technical Requirements:

- Standard 110-volt power outlet
- An ethernet switch port for each device
- A fixed IP address on your internal network that is reachable from the workstation that will be used for payment processing

Benefits

1. All-in-one solution
 - NCR support from acceptance to deposit
2. End to end encryption
3. Meet or Beat current Processing Pricing
4. No hidden fees
5. Rate lock during 36-month contract term
6. \$100 Early Termination Fee (regardless of # of locations)
7. Reporting & Residual Portal Access
8. Side by side cost analysis
9. MyMobileMoney Account inclusive
